Portfolio: <https://sm-portfolio-livid.vercel.app/>

Software Engineer with 4+ years of experience building web and mobile applications. Passionate about solving complex engineering problems, designing scalable architectures, and understanding systems from first principles to build reliable, high-performance software.

Experience

Xpression SDE - II - Independently design and develop scalable sys tems, ensuring performance and reliability. - Led development of projects like LaFetch (e-commerce) and the company’s core platform AlgorithmX, from architecture to deployment. - Manage and mentor the development team, ensuring code quality and timely delivery. - Responsible for end-to-end system deployment, including infrastructure setup and release management.	04/2025 - Present
DuckTale IT Services Lead Software Developer - Led a small team of 5 people (developers + QA) and made sure the work moved smoothly. - Worked closely with the business team to plan and design software ideas that could be shown to clients. - Delivered 4+ projects end-to-end across fintech, healthcare, customer autotune/IVR bypass, and video-conferencing domains. - Took care of assigning tickets, managing the team, reviewing PRs, and handling deployments. - Reduced front-end rendering issues by 35% by optimizing state management and component structures.	12/2022 – 11/2024
TechCompiler Data Systems Software Engineer - Supported full-stack development to enhance both frontend and backend systems. - Worked on complex projects like Wireless Guardian, integrating data from nearby	07/2022 - 11/2022

Projects

LaFetch - Designed and built the entire backend system from scratch supporting 28k+ active users, ensuring scalability, performance, and security. - Developed scalable APIs supporting mobile and web application, along with the admin and vendor panel. - Created an intuitive admin panel and a dedicated vendor panel for efficient platform management and operations. - Implemented key integrations such as Amazon SES for emails, BulkSMS for messaging, Shiprocket for order management, and Razorpay for payments. Web URL:- https://la-fetch.com/, Github:- https://github.com/sahil-malik04/laFetch-backend	
Invozio - Successfully led the development of a Sweden-based fintech project, resulting in over 3.5k+ active users (218.18% growth). - Built and optimized major front-end features, including note-taking, customer approval workflows, and bilingual support (English and Swedish). - Enhanced the user interface, performed SEO optimizations, and improved platform performance, increasing the Lighthouse score from 35 to 84. Web URL:- https://invozio.com/	
Medical Healers - Developed the backend system from the ground up using Node.js and PostgreSQL. - Created numerous RESTful APIs, ensuring data security throughout the integration process. - Solved challenges related to complex database relationships and table joins. Github Link: https://github.com/sahil-malik04/medical-healers-backend	

Skills & Abilities

Technical: C++, JavaScript, TypeScript, Data Structures & Algorithms, System Design, Microservices, REST APIs, GraphQL, Message Queues, Redis, Node.js, Express.js, React.js, Next.js, Redux, React Native, SQL, PostgreSQL, MongoDB, CI/CD Pipelines, HTML, CSS	
Cloud & Tools: AWS, Docker, Git, Jira, Twilio	
Interpersonal: Leadership, Problem Solving, Collaboration, Public Speaking	

Education

Postgraduate (PG): Masters in Computer Application (2023-2025) Chandigarh University GRADE: A+	
Undergraduate (UG): Bachelors in Computer Application (2018-2021) IK Gujral Punjab Technical University, CGC Landran, Mohali	

Certifications

- Hackathon Participant (National-level) - 2019 (Sponsored by Code::Blocks)
- C, C++ Test by Spoken Tutorial, IIT Bombay
- Fundamentals of Digital Marketing - 04/2020 (By Google)
- Certificate of Appreciation - Volunteer (Parivartan Fest)

Achievements

Excellence Performance & Quality Work Award from DuckTale IT Services.
